

Diagnostic Report

AI-Assisted Medical Summary

1. Diagnosis

No Tumor

2. Specialty

General Physician

3. Detailed Report

Condition Detected: No Tumor

The AI analysis of your 3D CT scan indicates a low probability of a tumor, with a confidence score of 95.00%. This suggests there is no abnormal mass or growth detected in the scanned region. 3D CT scans allow doctors to view detailed cross-sectional images of internal tissues, making it easier to identify potential issues like tumors. The absence of indicators associated with tumors suggests that the structures and tissues appear within normal limits. While this result is a strong indicator, it is not a confirmed diagnosis.

Further testing may be required if clinical symptoms indicate an issue.

Disclaimer: This is an AI-generated summary. Please consult a certified doctor or radiologist for medical confirmation and advice.

4. Detected Symptoms

No symptoms detected.

5. Recommended Tests

- Blood Test
- Imaging
- Consultation

6. Confidence Assessment

Confidence Score: 100%

High confidence in diagnostic analysis.

7. Clinical Recommendations

- Consult a General Physician
- Follow a healthy lifestyle
- Get relevant tests done
